3 DISPLAY READING

C1 counter visualizes hours in this format:

Examples:

- 12 hours and 59 minutes are visualized as **012.5**
- 13 hours and 05 minutes are visualized as **013.0**

4 INSTALLATION

To check a proper installation, please switch on the engine, place the C1 on the chosen position and wait a few seconds (around 8 – 10 s). The display will switch on showing the working hours and the blinking dot (if the position is correct).

Install the counter, with adhesive strip in the back, in a position with vibration coming from the engine (in motorbikes the best part is the outer part of the chassis), but not too close to hot components (as exhaust). Please clean deeply surfaces before install the C1 (for this it is suggested the use of low residue solvents – eg. acetone) with outer temperatures exceeding 10°C.

In order to avoid accidental detachments it is possible to use holes in the sides of C1 using two tie wraps to fix the product to the vehicle.

1: CLEAN PROPERLY THE SURFACES

2: REMOVE PROTECTION FROM C1 STRIP

3: FIX THE C1 IN A PROPER POSITION

4: IF NEEDED, USE TWO TIE WRAPS

5 NORMAL USE

Switch on the engine and wait a few seconds (around 8 – 10 s). The display turns on automatically, showing the working hours and the blinking dot.

In this condition **S** button is not working: it is not possible to visualize total and partial counters.

Once the engine is switched off, the counter will be active for a minute. The device will turn off automatically.

6 TOTAL COUNTER VISUALIZATION

Proceed as follow:

- Push briefly **S** button: the display shows **tot** for 3-4 seconds and, after this, the total working hours value for around 8 seconds.
- At the end of this visualization the display will turn off automatically.

7 PARTIAL COUNTER VISUALIZATION

Proceed as follow:

- Push briefly **S** button: the display shows **tot** for 3-4 seconds and, after this, the total working hours value for around 8 seconds.
- During the visualization, push **S** button briefly: display shows **Par** for around 3 seconds and, after this, the partial working hours for around 8 seconds.
- At the end of this visualization the display will turn off automatically.

WARNING: partial hours counter could increase differently from the total hours counter. This behaviour is related to the moment when the reset is done. **C1** visualizes tens of minutes but, in reality, internal counter is divided in to singles minutes.

8 PARTIAL COUNTER RESET

Proceed as follow:

- Push briefly **S** button: the display shows **tot** for 3-4 seconds and, after this, the total working hours value for around 8 seconds.
- During the visualization, push **S** button briefly: display shows **Par** for around 3 seconds and, after this, the partial working hours for around 8 seconds.
- Keep pushing **S** button until you see " - - - " blinking.
- Release **S** button: display will auto-switch off after a few seconds and the partial hours counter is resetted.
